Index

■ "This book is not, therefore, an attempt to debunk religion. Nor does it criticize those who accept a literal reading of the Genesis account of Creation simply as an article of religious faith."

■ "The scientific evidence tells decisively against the literal truth of Genesis. That fact does not mean that religion is refuted."

■ "I quarrel only with those who pretend that there is scientific evidence to favor the Genesis story understood literally". (p6)

Philip Kitcher is a philosopher of science. He published about the scientific and ethical aspects of the Human Genome Project and issues in the philosophy of biology.
